WALKING TRACK - SECTION

- Adjacent Surface Treatment as specified.
- 100x15mm Edge Timber Nail fixed to stakes. Ensure path and other surfaces finish flush with edge.
- Grade existing earth and compacted to 95% MOD. M.D. to 2 AS 1289.5.4.1. Sub-base to be prepared in accordance with IRC Specification 53D0 'Quarry Products' Class 1 or equivalent approved free draining non-plastic material.
- 75x15x400mm Joiner Timber Galvanised nail fixed to edge timber.
- 20x3x450mm stakes at 1750mm maximum centres.

GENERAL NOTES & SPECIFICATIONS

- Ensure walking tracks are located in accordance with detailed landscape plan and plan chapter of infrastructure design planning scheme policy.
- Australian Standards shall be in accordance with the current editions of the referenced Australian Standards except where varied by specifications and/or drawings.
- Material choices are to be determined on the grounds of sustainability, low maintenance, vandal resistance, product availability and suitability to the climatic conditions. Materials are to be locally sourced.
- Refer to the Brisbane Access and Inclusion Plan 2012-2017 for further information when planning and designing the built environment to reasonably consider access and inclusion for all where appropriate.
- Ensure mown height of grass (turf) area finishes flush with walking track edge.
- Ensure garden areas (mulch) and natural vegetation areas finish 25mm below adjacent F.S.L's of walking track.
- Ensure even grade cross-falls min. 1:50 to walking tracks.
- All dimensions in millimetres (mm. 0.).

TIMBER WORK NOTES

- Timber should be sourced from legal and sustainable sources. Timbers are considered acceptable where there is a high degree of certainty that they are from forests, either native or plantation, that are legally harvested and sustainably managed. The contractor is to submit evidence that the timber has been obtained from a legal and sustainable source.
- All timber to be acq pressure treated or tanalised (copper azol) to AS 1608 treated rough sawn appearance grade hardwood of one species.
- All exposed edges to receive min. 5mm wide radius.
- Prior to installation, all cuts, edges, joints to receive liberal coatings with an approved timber preservative.
- All timber in contact with ground to be preservative treated to hazard class 4S to AS 1604 and have a durability class 1 or 2 to AS 5804.
- All timber to be free of knots, splinters, cracks or any major defect.
- Timber preservatives - where no finish specified, all timber to receive 3 no coats of clear approved timber preservative such as Copper Naphthenate Oil (for above ground use) and Copper Naphthenate Emulsion (for below ground use).
- Locate timber edge as noted on plan.
- Fix edge with 2 (min) nails per stake.
- To form curves saw cut relief to edge to promote ease of bending. Stake at closer centres where required.

FIXTURES/FITTINGS NOTES

- All workmanship and material shall be in accordance with AS4000 & AS/NZS 1554.
- All fixtures/fittings unless specified are to be hot dipped galvanised unless in vicinity of saltwater/spray. Ensure all fasteners shall be stainless steel plastic separators shall be provided to avoid contact between dissimilar materials. Stainless steel grade 316 to be used. Where possible all fixings to be tamper/vandal proof to minimize damage or theft.
