BOULDER RETAINING WALL — SECTION

GENERAL NOTES & SPECIFICATIONS

- Ensure walls are located and landscaped in accordance with detailed landscape plan and park's chapter of infrastructure design planning scheme policy.
- Material choices are to be determined on the grounds of sustainability, low maintenance, vandal resistance, environmentally friendly composite materials, product availability, and suitability to the climate conditions and practicality. Where possible, materials are to be locally made or sourced rather than imported from overseas unless specified otherwise.
- Acceptable boulder types are to be acquired legally from a stone merchant, quarry or another sustainable source (not to be removed from bushland) or a protected natural environment unless permit and licenses are approved.
- The approved boulder type (used) to form the wall shall be of one consistent type, typically granite, sandstone, volcanic red rock, old porphyry, or other natural old bushrock boulders unless specified otherwise.
- Boulders as specified — best and most natural surfaces exposed, sharp / angled edges are not acceptable.
- Boulder wall to be constructed by a experienced contractor and must not exceed one metre in height adjacent finished surface level.
- All dimensions in millimetres (U.N.O.).
